DEVELOPMENTAL BRAIN RESEARCH

Author Index

Abboud, M., see Schechter, R. (116) 159
Andersen, S.L., see Lyss, P.J. (116) 201
Arias, P., see Feleder, C. (116) 151

Bär, P.R., see Houweling, D.A. (116) 87
Bastiaansen, M., see Copray, J.C.V.M. (116) 217
Basura, G.J. and Walker, P.D.
Serotonin 2A receptor mRNA levels in the neonatal dopamine-depleted rat striatum remain upregulated following suppression of serotonin hyperinnervation (116) 111
Bayer, S.A., see Broome, J.D. (116) 1
Belmar, J., see Soto-Moyano, R. (116) 51
Ben-Ari, Y., see Charriaut-Marlangue, C. (116) 133
Bernd, P. and Li, R.
Differential expression of *trk*C mRNA in the chicken embryo from gastrulation to development of secondary brain vesicles (116) 205
Birge, R.B., see Weinstein, D.E. (116) 29
Bridges, R.S., see Mann, P.E. (116) 21
Brien, J.F., see Kimura, K.A. (116) 211
Brinkley, L., see Morris-Wiman, J. (116) 141
Brook, G.A., see Houweling, D.A. (116) 87
Broome, J.D., Wills, K.V., Lapchak, P.A., Ghetti, B., Camp, L.L. and Bayer, S.A.
Glial cell line-derived neurotrophic factor protects midbrain dopamine neurons from the lethal action of the weaver gene: a quantitative immunocytochemical study (116) 1

Camp, L.L., see Broome, J.D. (116) 1
Charriaut-Marlangue, C., Richard, E. and Ben-Ari, Y.
DNA damage and DNA damage-inducible protein Gadd45 following ischemia in the P7 neonatal rat (116) 133
Cheon, E.W. and Saito, T.
Choline acetyltransferase and acetylcholinesterase in the normal, developing and regenerating newt retinas (116) 97
Cody, J.T., see Lehman, D.M. (116) 191
Comer, A.M., see Copray, J.C.V.M. (116) 217
Copray, J.C.V.M., Bastiaansen, M., Gibbons, H., Van Roon, W.M.C., Comer, A.M. and Lipski, J.
Neurotrophic requirements of rat embryonic catecholaminergic neurons from the rostral ventrolateral medulla (116) 217
Cramer, K.S. and Sur, M.
The neuronal form of nitric oxide synthase is required for pattern formation by retinal afferents in the ferret lateral geniculate nucleus (116) 79

Dam, K., Garcia, S.J., Seidler, F.J. and Slotkin, T.A.
Neonatal chlorpyrifos exposure alters synaptic development and neuronal activity in cholinergic and catecholaminergic pathways (116) 9
De Potter, W.P., see Fraeyman, N. (116) 127
Dobrenis, K., see Weinstein, D.E. (116) 29
Dunlop, L., see Skeith, A. (116) 123

Farooqui, S.M., see Zhang, K. (116) 181
Feleder, C., Ginzburg, M., Wuttke, W., Moguilevsky, J.A. and Arias, P.
GABAergic activation inhibits the hypothalamic–pituitary–ovaric axis and sexual development in the immature female rat. Associated changes in hypothalamic glutamatergic and taurinergic systems (116) 151
Fernandez, V., see Soto-Moyano, R. (116) 51
Foltz, G., see Mann, P.E. (116) 21
Fraeyman, N., Vanscheeuwijck, P., Wang, J.M., Huang, Y., De Potter, W.P. and Regan, J.W.
Changes in the expression of α_2-adrenergic receptor subtypes during maturation of neuronal cells from fetal pig superior cervical ganglia (116) 127
Fujita, E., see Urase, K. (116) 69
Funahashi, J.-i., see Okafuji, T. (116) 41

Galileo, D.S., see Skeith, A. (116) 123
Garcia, S.J., see Dam, K. (116) 9
Ghetti, B., see Broome, J.D. (116) 1
Gibbons, H., see Copray, J.C.V.M. (116) 217
Gieling, R.G., see Houweling, D.A. (116) 87
Ginzburg, M., see Feleder, C. (116) 151

Haas, K.Z., see Sperber, E.F. (116) 59
Hale, D.E., see Lehman, D.M. (116) 191
Harrison, J.M., see Lehman, D.M. (116) 191
Hernandez, A., see Soto-Moyano, R. (116) 51
Houweling, D.A., Brook, G.A., Gieling, R.G., Veldman, H., Woodhams, P.L., Nacimiento, W., Noth, J., Bär, P.R. and Joosten, E.A.J.
Differential distribution of immunoreactivity in the developing rat spinal cord revealed by the monoclonal antibody Py (116) 87
Huang, Y., see Fraeyman, N. (116) 127

Isahara, K., see Urase, K. (116) 69

Jackson, K.T., see Zhang, K. (116) 181
Johnson III, G., see Schechter, R. (116) 159
Joosten, E.A.J., see Houweling, D.A. (116) 87

Kimura, K.A., Reynolds, J.N. and Brien, J.F.
Ontogeny of nitric oxide synthase I and III protein expression and enzymatic activity in the guinea pig hippocampus (116) 211
Kusch, C., see Soto-Moyano, R. (116) 51

Lapchak, P.A., see Broome, J.D. (116) 1
Leach, R.J., see Lehman, D.M. (116) 191
LeBlanc, C.J., see Lyss, P.J. (116) 201
Lehman, D.M., Hale, D.E., Cody, J.T., Harrison, J.M. and Leach, R.J.
Molecular, morphometric and functional analyses demonstrate that the growth hormone deficient little mouse is not hypomyelinated (116) 191
Li, R., see Bernd, P. (116) 205
Linser, P.J., see Skeith, A. (116) 123
Lipski, J., see Copray, J.C.V.M. (116) 217
Lyss, P.J., Andersen, S.L., LeBlanc, C.J. and Teicher, M.H.
Degree of neuronal activation following FG-7142 changes across regions during development (116) 201

Mann, P.E., Foltz, G., Rigero, B.A. and Bridges, R.S.
The development of POMC gene expression in the medial basal hypothalamus of prepubertal rats (116) 21
Moguilevsky, J.A., see Feleder, C. (116) 151
Momoi, T., see Urase, K. (116) 69
Morris-Wiman, J., Brinkley, L. and Sego, R.
An in vitro model for the study of the role of innervation in circumvallate papillae morphogenesis (116) 141
Moshé, S.L., see Velíšková, J. (116) 119
Motoyama, N., see Urase, K. (116) 69

Nacimiento, W., see Houweling, D.A. (116) 87
Nakamura, H., see Okafuji, T. (116) 41
Nakayama, K.-i., see Urase, K. (116) 69
Noth, J., see Houweling, D.A. (116) 87

O'Donnell, J.M., see Zhang, K. (116) 181
Okafuji, T., Funahashi, J.-i. and Nakamura, H.
Roles of *Pax-2* in initiation of the chick tectal development (116) 41

Perez, H., see Soto-Moyano, R. (116) 51

Regan, J.W., see Fraeyman, N. (116) 127
Reynolds, J.N., see Kimura, K.A. (116) 211
Richard, E., see Charriaut-Marlangue, C. (116) 133
Rigero, B.A., see Mann, P.E. (116) 21
Romero, M.T., see Sperber, E.F. (116) 59
Ruiz, S., see Soto-Moyano, R. (116) 51

Saito, T., see Cheon, E.W. (116) 97
Sanhueza, M., see Soto-Moyano, R. (116) 51
Schechter, R., Abboud, M. and Johnson III, G.
Brain endogenous insulin effects on neurite growth within fetal rat neuron cell cultures (116) 159
Sego, R., see Morris-Wiman, J. (116) 141
Seidler, F.J., see Dam, K. (116) 9
Skeith, A., Dunlop, L., Galileo, D.S. and Linser, P.J.
Inhibition of β1-integrin expression reduces clone size during early retinogenesis (116) 123
Slotkin, T.A., see Dam, K. (116) 9
Soto-Moyano, R., Fernandez, V., Sanhueza, M., Belmar, J., Kusch, C., Perez, H., Ruiz, S. and Hernandez, A.
Effects of mild protein prenatal malnutrition and subsequent postnatal nutritional rehabilitation on noradrenaline release and neuronal density in the rat occipital cortex (116) 51
Sperber, E.F., Haas, K.Z., Romero, M.T. and Stanton, P.K.
Flurothyl status epilepticus in developing rats: behavioral, electrographic histological and electrophysiological studies (116) 59
Stanton, P.K., see Sperber, E.F. (116) 59
Sur, M., see Cramer, K.S. (116) 79
Suter, U., see Wulf, P. (116) 169

Teicher, M.H., see Lyss, P.J. (116) 201
Tokunaga, A., see Urase, K. (116) 69

Uchiyama, Y., see Urase, K. (116) 69
Urase, K., Momoi, T., Fujita, E., Isahara, K., Uchiyama, Y., Tokunaga, A., Nakayama, K.-i. and Motoyama, N.
Bcl-xL is a negative regulator of caspase-3 activation in immature neurons during development (116) 69

Van Roon, W.M.C., see Copray, J.C.V.M. (116) 217
Vanscheeuwijck, P., see Fraeyman, N. (116) 127
Vathy, I., see Velíšková, J. (116) 119
Veldman, H., see Houweling, D.A. (116) 87
Velíšková, J., Moshé, S.L. and Vathy, I.
Prenatal morphine exposure differentially alters seizure susceptibility in developing female rats (116) 119

Walker, P.D., see Basura, G.J. (116) 111
Wang, J.M., see Fraeyman, N. (116) 127
Weinstein, D.E., Dobrenis, K. and Birge, R.B.
Targeted expression of an oncogenic adaptor protein v-Crk potentiates axonal growth in dorsal root ganglia and motor neurons in vivo (116) 29
Wills, K.V., see Broome, J.D. (116) 1
Woodhams, P.L., see Houweling, D.A. (116) 87
Wulf, P. and Suter, U.
Embryonic expression of epithelial membrane protein 1 in early neurons (116) 169
Wuttke, W., see Feleder, C. (116) 151

Zhang, K., Farooqui, S.M., Jackson, K.T. and O'Donnell, J.M.
Effects of noradrenergic lesions on the development of rolipram-sensitive, low-K_m, cyclic AMP specific phosphodiesterase in rat brain (116) 181
